RESEARCH
Human Health
The Technion Human Health Initiative (THHI) brings together science, engineering, and medical faculty, to address global human health challenges, combining clinical insights with scientific excellence.
Sustainability
A comprehensive multidisciplinary campaign to fast-track global sustainability and clean energy, through transformational science and engineering.
TECHNION VISION
Academia-Industry Ecosystem
Create a new ecosystem with industry, based on pioneering models for synergetic collaboration, that will best serve Israel and the world in the 21st century.
Excellence & Leadership
Train a new class of scientists and entrepreneurs for leadership roles in research and disruptive technologies. Advance scientific innovation focused on societal and environmental impact.
Social Responsibility
Ethics, freedom of thought, and the use of knowledge to make the world a better place have always been the driving force behind the Technion.
